WHITEPAPER

DOGE D. LUFFY: A community driven multi-platform system for investors, service providers, experts and learners in crypto.

Telegram -@NekoKaioh

www.dogedluffy.com

Abstract:

Doge D. Luffy is attempting to build a multi-platform system to empower anime lovers, investors, service providers and people who want to build products and services in the crypto space. These will be in the form of social anime meetings on existing social media platforms and newly created web3 platforms. It begins with the launch of the token which is technically a rewards token. The tax on the coin will be orchestrated based on the market and state of the project to make it effective for investors to hold the coin, as well as provide the necessary funds for the project to develop the utilities, grow the team and run the operations.

1. Overview

The advent of Bitcoin attempted to solve the double spending problem in digital payments by building a peer-to-peer technology with an effective trust-less model for the validation of transactions. Since the invention of Bitcoin, blockchain technology has come a long way, with innovations such as Layer 2 chains, Non-Fungible Tokens (NFT) and Decentralized Finance (DeFi) to name a few.

Now people have option to transact on multiple blockchains, select faster networks, decentralized money is even programmable with the use of smart contracts. Art and assets have been digitized as NFT's (Non-Fungible Tokens). Digital social spaces on the metaverse are becoming the next cool hangout places. The possibilities are limitless and we are fortunate to be here to witness it as it unfolds just like it was during the beginning of the Internet era.

3. Mission

To build a safe, decentralized space in crypto that helps people and anime lovers connect and up-skill in their crypto journey. Building awesome dapps and a video streaming platform that lets token holders stream anime without any hustle.

4. Ecosystem Token – Doge D. Luffy

This will be a high reward token and will be launching first on the Binance Smart Chain rewarding in DOGE and later will launch unbridged on the Ethereum chain. Below is the Binance Smart Chain launch information which is as per the plans in place.

- Total Supply = 100,000,000 (100 Million)
- Max Buy in Presale Sale = 1 BNB
- Presale = SF/HC (30/60 BNB)
- Max Buy in Presale = 1 BNB (We are discussing to make this 0.5 BNB)
- Liquidity = 60% of raised Presale will be used for Liquidity
- Launch Price = Same as Presale
- Tax will be first 12% Buy/Sell, then gradually reduced each time hitting a MC milestone

5. Safety and Security of the Token and Investors

A. To ensure the safety of the project specially from whale manipulation, we are trying to launch at a decent high market cap, to avoid early whales.

B. As a security we are limiting the private sale and presale max contribution to 1 BNB with an allocation of only 0.10% to 0.5 % of the supply. This would help with people having smaller wallets at launch and reduce the sell pressure from early investors, also rewards will be highly beneficial in motivating investors to hold their bags.

C. We will have implemented another whale protection by limiting the Max Wallet to 2% early on at launch and max sell at 0.5%, as we grow and progress these limits can be cautiously increased.

D. Liquidity will be locked for a shorter period at launch to monitor the health of the smart contract, once we have ensured everything is working perfect with the smart contract, before that unlock period the liquidity lock will be extended to 1 year.

E. No team tokens / Project tokens are unlocked at launch, all tokens will be vested for a short period and extended to 3 months before the unlock time.

The token launch is to pave the way to build the core utility of this project.

Core Utility - *Social Media and a Market Place platform for Crypto.*

A web3 platform where people can connect with each other, buy and sell products and services, initially a website and later a hybrid mobile app for Apple and Android.

Case 1 Services:

- Service Providers - Influences, Techies, Designers, Marketers, etc. can list their services and work on requirements of customers.

- Service Consumers - Can come and buy services rate or view ratings to take a better call. Their funds will be parked in Smart Contracts until those services are completed as per the agreement.

Case 2 Social:

- Casual Crypto Investors - Can have their profiles set up, post small messages on their profile, connect with other users, broadcast messages to followers, auto post their trades, check trending trades.

- Projects Can list their profile - and get followers and broadcast messages.

Revenue Model:

- There will be a variable fee percentage charged on the services bought on the platform.
- There will be subscription-based services for project owners to get insights on their projects and communicate to their investors as a group or directly from wallet to wallet.

- Advertising will be key as well once we have a strong user base this will become a major revenue source for us.

- Anime Streaming platform will generate revenue through subscription based smart contract which will be implemented on stage 4 of the roadmap.

This utility's concept will be growing and modified as we progress, but above is the outline of the main utility. A portion of the revenues generated here will be used for buybacks and burns to support the chart of the ecosystem token when needed.

Other Utilities

Social Doge D. Luffy Clubs

Initially we have thought of three clubs once we hit certain numbers in our telegram group at distinct points, these will be as mentioned below. Clubs will be introduced or removed based on the market needs.

- Doge D. Luffy - Tech Club, where people learn from each other, be it web3 and other tech stacks

- Doge D. Luffy – Art Club, where people can come together to learn about Graphics and Art

- Doge D. Luffy – Investors, a place to learn how to DYOR, talk about new launches and potential moonshots.

The idea behind these clubs is to be a helpful place created by us but grown by the community and for the community without aspirations of being judged upon, kind of a safe positive heaven for people of any background in crypto.

Doge D. Luffy NFT's

As the clubs grow, we will be launching our special NFT's series and a portion of them will be rarer and rewarded to most contributing members of the club, these specific NFT's will bring special privileges and some additional surprise rewards to their holders.

7. Team

Doge D. Luffy DEV (Founder) – @NekoKaioh

Ben Ten (Core Team) -@ BenTactic

Artistic Angelo (Design)

9. Anonymity

We choose to remain anonymous as its to avoid untoward attention to our personal lives and ensure the safety of our friends and families. The Founder will personally KYC when phase 4 has been reached for the purpose of the legality issues of the stage 4 roadmap.

10. Disclaimer

This is a living document and information is up to date at the time of publishing. Please note information herein does not constitute investment advice, financial advice, trading advice, or any other sort of advice and you should not treat any of the content as such.

The Doge D. Luffy (DogeLuffy) team suggests you conduct your own due diligence and consult your financial advisor before making any investment decisions. By purchasing any Doge D. Luffy product, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the products "as is" and is not required to provide any support or services. You should have no expectation of any form from the Doge D. Luffy Ecosystem and its team. Although Doge D. Luffy is a community driven DeFi Ecosystem and not a registered digital currency, the team strongly recommends that citizens in areas with government bans on Crypto do not purchase it because the team cannot ensure compliance with your territory's regulations. Always make sure that you are in compliance with your local laws and regulations before you make any purchase.
